

AEROSOL DISINFECTOR

THE EQUIPMENT: The Aerosol Disinfector is made of stainless steel 304 Grade with a strong heart – a centrifugal sealed type fractional motor. The Motor shaft, nuts and bolts are of high quality steel & brass. Other Components used in equipment are made of good quality rubber & Thermoplastic to assure the durability and non corrosion of the equipment.

AEROSOL DISINFECTOR: It splits the solution of formalin & water (30: 70) into micro particles. Due to high aerodynamic stability the formalin droplets remains suspended In the atmosphere for longer duration and because of penetrating property it Ensures 100% sterile germ free zero bacterial environment. The goley Multipurpose disinfector instantly destroys even air born bacteria. It can Be easily operated. the goley disinfector is ideally for de-contamination Of pharmaceutical labs, hospitals, production units, animal houses, poultry farms, egg storage and silk warm rearing houses in sericulture industries

DOSE (for 1000 cubic feet room area)

- 1) For routine disinfection 30 ml of formalin (of 40% concentration) with 90 ml of clean water
- 2) For intensive disinfection 90 ml of formalin (of 40% concentration) with 90 ml of clean water

SIZES AVAILABLE:

1.5 Lt Capacity
5 Lt capacity

SPECIFICATION

	1.5 Lt	5 Lt
Type of equipment	: Cup Type Atomizer	Cup Type Atomizer
Maximum height	: 385 mm	465 mm
Outer diameter	: 315 mm	370 mm
Weight with sump	: 8-9 kg approx	11-12 kg approx
Connecting load	: 100 W	100 W
Rating	: continuous duty	continuous duty
Atomizing capacity	: 30-50 ml / min	30-50 ml / min
Motor Rating	: 1/6 H.P	1/5 H.P

ACCESSORIES (Optional)

Timer fitted in S.S rectangular box
